

Development of Municipal road networks

Development and modernization of roads is in terms of value the biggest package of municipal investments which are ongoing and planned by 2025. In order to maintain transparency of such a large number of tasks, they have been divided into groups – in accordance with their importance for the road system of Toruń. This division is as follows:

1. The new course of national road No. 91 with the bridge on the Vistula River in Toruń (the Eastern Route)
2. The North Diametral Route
3. The Staromostowa Route
4. Other roads of the city main road system
5. Other roads
6. Local roads

The list of investment projects related to development of the main road system of Toruń (points 1-4 of the above list) contains a set of information grouped in accordance with the following scheme:

- tasks listed in the Multiannual Financial Perspective for the City of Toruń - ongoing or completed;
- tasks listed in the Multiannual Financial Perspective for the City of Toruń – to be implemented;
- tasks listed in the Multiannual Financial Perspective for the City of Toruń – on the reserve list;
- tasks not included in the Multiannual Financial Perspective for the City of Toruń.
